

**Prof. dr. Matthijs Verhage** obtained his PhD at the University of Amsterdam in 1990 (*cum laude*, main PhD-supervisor: prof. Fernando H. Lopes da Silva). He received post-doctoral training at the labs of prof. David G. Nicholls (Dundee, UK) and the recent Nobel laureate prof. Thomas C. Südhof (Howard Hughes Medical Institute, Dallas).

Since 2000 he is full professor and head of the Department of Functional Genomics at the Vrije Universiteit (VU) and VU University Medical Center (VUmc) in Amsterdam.

In 2003 he became the first chairman of the Center for Neurogenomics and Cognitive Research (CNCR, established in 2002). He was co-founder and vice chair of the Dutch NeuroBsic Mouse Phenomics consortium.

Matthijs Verhage is partner of several European research consortia ([EU-Synapse](#), [EuroSpin](#), [SynSys](#)), member of national and international grant committees, editorial boards and governmental advisory boards. He is also consultant/scientific advisor for Life Science companies in The Netherlands, Spain, Switzerland and Japan.

In 2012 he received the ERC Advanced Grant of the European Research Council.
